

# Soft Motorcycle 360<sup>™</sup>

The Soft Motorcycle 360 is a durable and realistic surrogate motorcycle target that is stable at speeds of up to 80km/h. Its rotating wheels and realistic shape mean that it is reliably recognized by vehicle sensor systems including cameras, radar and lidar.

Durability is key to the Soft Motorcycle 360's design, with its lightweight foam construction minimizing the potential for vehicle and target damage. Plus its modularity means that when parts are damaged they can quickly and easily be replaced.

The Soft Motorcycle 360 was developed by the same team that brought us the iconic Soft Car 360®, and its design is the result of years of real-world testing experience gained working with the world's leading OEMs and the National Highway Traffic Safety Administration (NHTSA).

Soft structure and light weight minimizes damage to target and test vehicle

Modular design for easy reassembly

Moulded foam construction enables realistic shape for improved visual recognition

Recognized as a real motorcycle by sensing technologies including camera, radar and lidar

Euro NCAP approved and complies with ISO 19206-5 draft requirements

Rotating wheels provide speedmatched Doppler effect for radar sensors

Stability proven at 80 km/h when paired with the AB Dynamics LaunchPad™ 80 platform

## **Specifications**

#### **Dimensions**

Performance

Max. collision speed

Water resistance

| Wheelbase      | 1460mm |
|----------------|--------|
| Wheel diameter | 635mm  |
| Overall height | 1670   |
| Width          | 610mm  |
|                |        |

80km/h

Yes

#### Supported sensor testing

| Ultrasonic         | Yes |
|--------------------|-----|
| Mono/stereo camera | Yes |
| Lidar              | Yes |
| Radar              | Yes |
| Compliance         |     |
| ISO 19206-5 WD     | Yes |
| Euro NCAP approved | Yes |

#### About DRI

DRI is an AB Dynamics Group company that has provided research and testing services to the world's leading vehicle manufacturers and suppliers for over 40 years. Today, we provide year-round dynamics, ADAS and K&C testing services from our California proving ground. We also offer comprehensive human factors research services and have developed a world-leading range of surrogate ADAS targets.
